Photos Taken

Photo 1

Chemical Readings

Chlorine: 1.50

pH: 7.20

Tasks Completed

Netted debris from the surface

Emptied skimmer basket

Emptied leaf canister

Vacuumed pool / spa
Brushed pool and spa walls / floor
Cleaned / brushed tile
Checked auto-fill & pool equipment
Cleaned coping
Tested water chemistry
Added chemicals
Cleaned Filter
Inspected / cleaned salt cell

Notes

Your pool water level is low. Do not be overly concerned, as we have turned off your skimmer to protect your pump. Please realize a pool can lose 200-300 gallons of water per week from evaporation alone. Please add water at your earliest convenience to maintain a mid-tile water level. Once the water level is restored, we will turn on the skimmer on your service day.

Chemicals Added

Chlorine (2.50 Gallons)
Muriatic Acid (4.00 Liquid Ounces)
